

A Dragon

Stick wings onto top of tube body. Stick spines on to top of wings. Leave overhang of spines at both ends of body. (Two short rows of spines cut from six pack egg boxes will work as well as one long one.) Stick head onto "neck" overhang. Make tail by threading lots and lots of cardcups on to string. Tie knot with card stopper to prevent cardcups falling off. Stick loose end of string inside tube body. Add two or four cardcup "claws" under tube body. Paint, hang with thin string or cotton.
